PROJECTS

Outplacio (Outplacement Program Dashboard) 🔗

- Built a responsive outplacement management dashboard with **reusable UI components** and a clean modular structure for scalability.
- Implemented **multi-layout** routing (public landing pages + dashboard layout) to support **product-style** navigation and user flow.
- Developed core modules including **Tasks, Notifications, Reports (CSV/PDF), Contracts, Feedback, and Settings** for a complete dashboard experience.

Project Management Dashboard (NexTask) 🔗

- Developed a robust project and task management system using **Next.js** and **Material UI**, focused on clean UX and scalable architecture.
- Implemented key modules including **Projects/Tasks, Invoicing, Customer management, and Reports** within a dashboard-based interface.
- Built advanced reporting functionality with **CSV and PDF export** support for structured data sharing.
- Designed a scalable **notifications system** to support real-time updates and future backend integration.

Ecommerce single vendor platform (Commercehub) 🔗

- Built the application using **Next.js, Node.js, Express, MongoDB, and Material UI**, following a scalable full-stack architecture.
- Implemented a secure **JWT-based authentication** system with protected routes and role-ready access control.
- Managed complex client-side state using **Redux Toolkit**, improving predictability and maintainability across modules.
- Deployed the platform on **AWS** using **S3** and **CloudFront** for fast, globally distributed static hosting.
